A Great Inspiration The thousands of children too young

The thousands of children too young to realize what the loss of thousands of lives in battle means, always will remember the time they were called upon to douate some small sum to help make a real Christmas for far-away little ones who far a terrible reason were to have no Santa Claus this year.

When the great inspiration of the editor of the Chienga Record Herald was put into prist, it became a national movement in a day, and when The Advertiser published the first accounts of this movement the same spirit which carried it everwhelmingly throughout the mainland caused Hawaii folk to take held for the purpose of doing their shire in the enterprise.

A committee camposed of Mrs. Walter L. Emory, Mrs. Clairles M. V. Forster, Mrs. J. W. Caldwell, Mrs. C. M. Cooke, Jr., and Miss M. M. Catton, treusurer, have gone to work and by next Monday merning expect to have Hawaii's contribution on the way to its destination, if the contributions are in the transfer of the Republican relies, and spoke at each meeting.

"I realize that J. will have a hard fight on my hands to win this election," he said yesterday. "I have a strong opponent, who is a popular and well liked man, and I shall have to device the voters," he added. School Children Bolicited

Appeals have been sent to every hool principal and teacher in the Territory to present this matter to the children under their charge. They are maked to tell the little ones of these other little children who will have no

The matter could not be taken up officially through the department of public instruction, but the officials of the department are heartily in sympathy with the entire movement and of the manner in which it will be compared conditions continue.

In addition to the direct appeal te school children, boxes have been placed in the dewn-town drug stores to receive the direct contributions of well wishers, none being too small or none too large.

Contribution Goes to Chicago

The local committee at first was at a loss as to the best manner in which to send the contribution from Hawaii, but The Advertiser has the following eablegram from the Chicago Record-Herald, the accepted head and center of

Quarterly Report of Municipal Engineer Wall Contains Some Interesting Figures

Public Utilities Taken Over From **Territorial Government Prove** Good Investment

House cleaning done at the time the municipal government took over the water and sower works from the territory, and the general retrenchment policy declared to have been put in twee at that time, seem to have resalted in a material re-luction in the cost of maintenance and operation of these two new departments of the city.

Such at least is the impression given by figures prepared under direction of W. A. Wall, city engineer, which embrace the cost of pumping water, and give estimates on the receipts and disbursements in both departments for the present annual period, comparing both both sets of figures with similar set-compiled for a period of similar length

under the old regime. Some Big Reductions Noted

The figures on water pumping are for the first three months—July, August and September—of the county's juris-diction of that department. They show— to strike a total—that the entire cost of pumping for the quarter was state of pumping for the quarter was \$3,743.20, and that for the same months in 1912—when the department was under the territorial superintendent of public works—the cost was \$6,695.89. The figures show also that for the period, 362,000 gallons were pumped in 1913, and 381 381,000 gallons in 1914.

Wall allows for a startling volunties.

1913, and 381 381,000 gallons in 1914.

Wall allows for a startling reduction in his estimate on the operating expenses of the water works for the fiscal year closing June 30, 1915, over the cost for a similar period in 1914. He sets this expense at \$92,985, while in 1914 it was \$120,885,83. The interest on bonds is figured in on the running expenses, and it of course remains the same -\$35,235.40,
If Wall's estimates are correct, there

if wall's estimates are correct, there will be carried over as profit in the water department at the end of the fiscal year, the sum of \$46,379.60, as against \$7,391.35 in 1914. In making this estimate he allows for receipts amounting to \$179,000. In the former year they were \$174,607.39.

Sewers Increase in Profit In the sewer department he does no make such radical reductions in maintenance, but does make startling in-creases in profit. He cuts the operat-ing expenses down about \$1000 for the year, estimating them at \$28,500. The re-ceipts for the year he practically dou-bled, putfing them at \$28,000. This is because the sewer rate was dou-bled. If this cost and disbursement

ear, are summed up by Wall with these

Waterworks balance, \$46,379.60; Less sewer deficiency, \$14,874.12; Bulance on band, \$31,505.58. Balance on mand, Salandess.
To those on the board of supervisors who declared the territory was handing them a "white elephant" when the transfer was made, these figures of Wall's will come doubtless as a surprise, especially when they remember that in the 1914 annual period, in place of there being a large balance on hand at the end of the fiscal year, there was deficit of \$13,610,39.

A. Thomas would be offered the position.

The question now is whether Mr. Thomas would accept the office. Mr. Thomas, who was on the staff of the federal district attorney's office in San Francisco, was sent here to relieve Mr.

Francisco, was sent here to relieve Me-Carn for sixty days or energy his trial. With the story that Metern has re-signed comes the report that he will leave the Territory as soon as possible after the charge against him is disposed of. It is believed that J. W. Thompson, assistant district attorney, also
